

PROGRAMME DESCRIPTION

In the current market dynamism and fast-changing business environment, projects are being used frequently to plan and to manage multiple projects at once. The MBA in Project Management is to produce professionals with systemic vision who are able to perform in both public or private organizations in any branch of economic activity, using techniques, technological tools and best market practices, based on the knowledge and encompassing steps of initiation, planning, executing, controlling and closing projects. The program would also encourage entrepreneurship so that new infrastructure businesses can be developed within the country in order to contribute to the country's development and economic prosperity. This program provides the foundation of a master's degree in business administration, with emphasis on leadership and problem solving. In a rapidly globalizing economy, there is an increased demand for the skills needed to successfully create and implement a business plan in real time. The program prepares students to act decisively and strategically in real world scenarios.

PROGRAMME AIM

The Master of Project Management aims to produce graduates who have appropriate skills and knowledge to be capable of managing small, medium and large-sized projects either as a senior team leader, a project manager or project director.

The program of Master of Business Administration in Project Management will produce Project Managers who are:

- ▶ Knowledgeable to apply project management skills in order to handle the challenges and opportunities of rapidly evolving project management sector.
- ▶ Capable of working successfully as a professional who practices appropriate values and ethics in different projects by taking into consideration the societal benefit.
- ▶ Able to communicate in a team to initiate, execute and evaluate a project plan for the development and practice of critical thinking and effective managerial skills to solve problems as a leader.
- ▶ Able to be engaged in independent and life-long learning in the broader context of technological change for project management in the public, private and international spheres.
